

Tutorial Summer Work

We are so pleased that you have selected Wyke as your sixth form provider and look forward to supporting you over the course of your programme of study. Our role at Wyke is not just to provide you with the best level of education, but also guide you in your next steps and ensure that you leave us in two years' time ready for the world!

We would like you to complete the following research task that links to your study programme. Using the following prompts, write the results of your research down and explain how these have helped you to support your career pathways post Wyke. You might want to access some research tools such as the UCAS website, or the national careers service. You will be required to bring this to your first tutorial in September.

1. Why have you chosen your programme of study and how do they link together?
2. What career paths can you access with your programme of study?
3. What specific qualities/skills do you need for these jobs/roles? (eg communication, team work) and how will you evidence these?
4. Will you need any additional qualifications/experience to access the career you are aspiring to? E.g. will you need a degree or a work experience?
